## Charlie's Soap All Purpose Cleaner Quick Reference

- Use Charlie's Soap All Purpose *full strength* if you can rinse the surface with lots of water with no trouble.
  - Clothes, hands, showers, tubs and sinks, tires, the dog, etc...
- Use Charlie's Soap at *1/2 strength* if you still need enough detergent to get the job done but rinsing with a lot of water will be difficult. Rinse instead with a wet sponge or wet chamois.
  - Counter tops, stove tops, appliances, scuffs on floors, walls, etc.
- Use Charlie's Soap at *1/4 strength* or less for spray on/wipe off cleaning.
  - Table-tops, furniture, vinyl car seats, etc.

## More tips

- Carpets: To clean a spot, wet the area, spray Charlie's Soap All Purpose *full strength* one good time on the spot. Let it sit for a few minutes (up to 5 for normal stains, and longer for worse stains). Agitate. Add water and blot up with towel or use a wet/dry vacuum. For the whole carpet, use no more than *half* the recommended amount of the leading brand cleaner in a carpet cleaner. For example, if your carpet cleaning machine calls for 1 cup of a particular cleaner, use  $\frac{1}{2}$  cup of Charlie's.
- Hard floors: On a 15 x 15 room, spray Charlie's Soap All Purpose *full strength* a few times across the entire floor (no more than 5 sprays). Mop up with water. You can spray it full strength on a single spotted area and mop up, as well. You can also use  $<1\%$  strength to mop with.
- Cars: 1 cup of Charlie's Soap All Purpose to a 5 gallon bucket of water. Sponge on the mixture, and rinse it periodically.
- Pets: Lather in Charlie's Soap All Purpose and rinse periodically. Avoid contact with pets' eyes.
