Dear Charlie's Soap customer,

Thank you for considering Charlie's Soap. We feel confident that you have made the right choice in detergent. We are here in case you have any questions. Let me take a moment to explain how to use Charlie's Soap when you have sensitive skin.

- 1) The machine should be cleaned of all residues of other detergents before washing your clothes in Charlie's Soap. Put 2 TBSP of the Powder or 2 fl.oz. of the Liquid into the machine and some old rags and run a full cycle with a double rinse.
- 2) Always use at least the full amount of Charlie's Soap for a diaper load: 1 fl.oz. for the Liquid, or 1 TBSP for the Powder. Charlie's Soap will rinse completely so there is no need to worry about residue. Charlie's Soap needs that full amount to be effective on diapers. More could be required for excessive stains. Call for info if you have hard water.
- 3) Clothes that have been washed in anything other than Charlie's Soap likely have detergent residues. Charlie's Soap will clean those residues to the exclusion of other stains until they are gone. It may take several washes with a full dose of Charlie's Soap to remove those residues, not just bring them to the surface of your garments. It is advisable to wash clothes that are new to Charlie's Soap 2 or 3 times before wearing them. We want to ensure that nothing touches your skin but clean clothes.

If you develop itching from clothes washed in Charlie's Soap, take that garment aside and wash it alone twice with Charlie's Soap, each time with a double rinse. This is a sign that not all the old residues were removed. They have only been pulled to the surface where you can feel them. A quick two washes should alleviate that problem.

Thank you again for choosing Charlie's Soap. Call us if you have any questions at all. We're always willing to help.

Taylor Sutherland  
President, Charlie's Soap, Inc.
